Benefits

- The infeed can be either from the top or the bottom as the terminals are identical
- Clear and visible conductor connection that can be easily checked in front of the busbar.
- Large and easily accessible wiring space enables easy insertion of conductor in the terminal.

- Integrated movable terminal covers located at the cable entries ensure the terminals are fully insulated when the screws are tightened.
- The effective touch protection when grasping the device considerably exceeds the requirements of BGV A3 (German accident prevention regulations).

 Manual snap-on fixing and release systems that require no tools enable quick assembly and disassembly of MCBs.

- The MCBs can be quickly and easily removed from the busbar assembly by hand if connections need to be changed
- Time saving if parts need to be replaced because the busbars no longer need to be freed from the adjacent miniature circuit breakers.
